BIOGRAPHY

I'm delighted to introduce myself as a psycholinguist (or neurolinguist, depending on the context). I'm passionate about exploring the intricate relationship between language and the mind. I'm delve deep into how humans acquire, produce, and comprehend language, examining the cognitive processes that underpin these linguistic abilities. From syntax to semantics, phonetics to pragmatics, I'm fascinated by how our brains encode, store, and retrieve language-related information.
